Subject: a few numbers

John:

Here is the exact language in the "transition plan" two-pager we are preparing that needs input from you guys:

- Reconnaissance and Hazard Evaluations are 100% complete in 12 of 16 counties in this area of responsibility, and 90% complete in 4 of the 16 counties
- Recovery of containers and characterization is X% complete

Basically, what is listed above is for Bravo branch, and we need similar estimates for the other branches.

Call if questions.

Thanks

David Williams
